DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on 02/19/2007 is acknowledged and has been entered into the records. The applicant has amended claims 1 and 6, and cancelled claim 4 in response to the previous office action. The Examiner has accepted applicant's amendments. Claims 1-3 and 5-8 are currently pending in the application.

Allowable Subject Matter

2. Claims 1-3 and 5-8 are allowable.

3. Claims 1 and 6 would be allowable because the prior art of record, taken alone or in combination, fails to disclose or render obvious a magneto-optical imaging method/device comprising lock-in detecting intensity modulated polarized source light beam reflected from the surface located between the active material and the target material, and observing the angle of Faraday rotation in the reflected beam, with respect to the incident beam, which is created in the active material by an interfering magnetic field produced by the target material, wherein the Faraday rotation of the active material is substantially proportional to its magnetization when it is subjected to an interfering magnetic field, perpendicular to said face and varying in a minimum range extending between substantially -100 Oersted and substantially +100 Oersted, in combination with the rest of the limitations of the respective claims.

4. Claims 2-3, 5 and 7-8 are allowable because they are dependent on independent claims 1 or 6, or an intermediate claim, and they include all the allowable limitations of the parent claim(s).

Art Unit: 2886

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
